

Next-gen protection against active malicious IPs in real time.

ELLIO: Threat List is the largest, most advanced next-generation external dynamic list of IP addresses and network entities anticipated to pose threats to corporate networks in the near future.

Block mass
exploitation.

Reduce
perimeter
footprint.

Filter out
evil bots.

Hold off
attackers until
detections are
available.

Beyond traditional blocklists.

It is the largest, most dynamic threat list with zero False Positives.

4X
LARGER

ELLIO: Threat List MAX contains between 175,000 and 450,000 entities at any given period, leaving competition in the dust.

15X
FASTER

Others proudly offer updates every hour or every 15 minutes. We update our lists every 1 or 5 minutes, depending on your plan.

2X
IP ROTATION

On average, we rotate over 10% of IP addresses per day.

Choose your threat list:

ELLIO: Threat List **MAX**

The largest and most dynamic blocklist on the market.

ELLIO: Threat List **ONE**

Tailored to network perimeter. Self-service web portal.

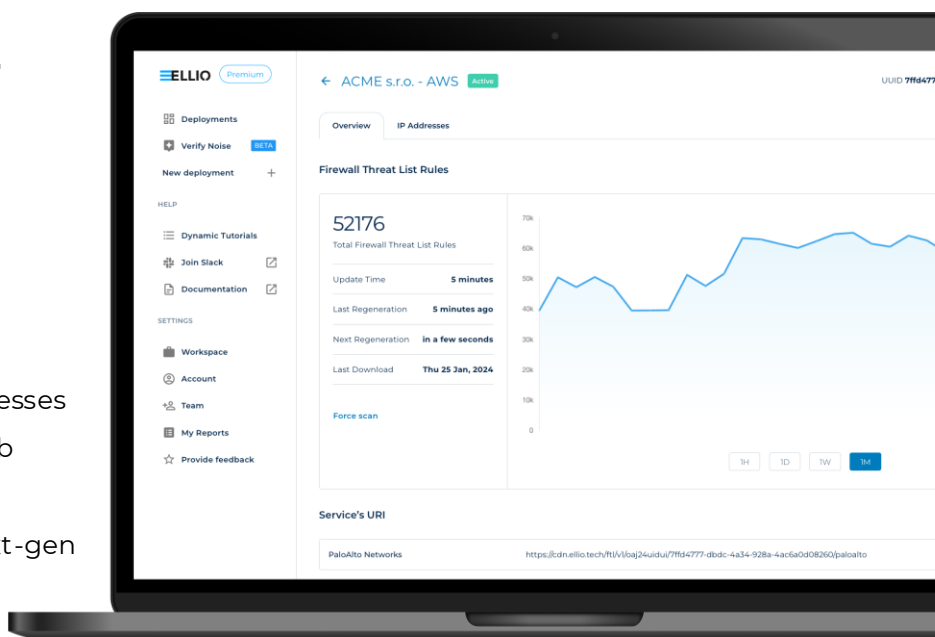

Compare and choose your threat list.

ELLIO: Threat List ONE

- Tailored to each network perimeter.
- Self-service web portal.
- Seamless integrations with NGFWs
- Unlimited workspaces under one account. Live reports.
- AI chatbot to verify suspicious IP addresses in logs, whether they come from a web server, reverse proxy, or other sources.
- Suitable for networks with various next-gen firewall vendors.

Sucessful customer stories.

Boost protection capabilities of your next-gen firewalls.

Fortinet

Check Point

pfSense

38.000.000

ELLIO: Threat List filtered out more than 38 million unwanted connections during 30 day period.

8.640

8.640 different threat lists were automatically downloaded by the customers' NGFW during 30 day period.

270.000

Each dynamic ELLIO: Threat List MAX contained on average over 270.000 IP addresses.

0

After activating ELLIO: Threat List MAX, the number of reported False Positives is zero.

Fortinet

Check Point

pfSense

3.000.000

ELLIO: Threat List ONE filtered out more than 3 million unwanted connections in 45 day period.

100.000

Over 100.000 different threat lists were automatically downloaded by the customers' fleet of NGFWs in just 45 days.

60.000

Each dynamic ELLIO: Threat List ONE contained on average over 60.000 rules.

800%

After activating ELLIO: Threat List ONE, the number of detections increased by more than 800% within the New Anti-Virus blade on Check Point.

Fortinet

Check Point

pfSense

15%

The overall traffic to the customers' network dropped by 15% after 2 months. This includes traffic from bots, spray-and-pray attackers and opportunistic exploitations attempts.

720

720 different 60-minte threat lists were automatically downloaded by the customers' firewall during 30 days.

75.000

Each dynamic ELLIO: Threat List ONE contained on average over 75.000 rules.

60 days

After activating ELLIO: Threat List ONE, customers' infrastructure disappeared from services like Shodan and Censys after 60 days.
