

VeggieDog Denties

The sustainable vegan chew for clean teeth

How can you combine dental hygiene with saving the planet? The answer is our new Green Petfood VeggieDog Denties for your four-legged friend! These grain-free chews are the perfect complement for our popular VeggieDog product – which is why they have been named accordingly. The great thing is, these Denties are 100% vegan! We developed them with the help of nutritionists and veterinarians – in Germany and only with the very finest ingredients. The result is a green superhero that promotes chewing thanks to its star-shaped design and contains cellulose to offer exceptional support for everyday dental hygiene – with gum massage included!

Delicious tapioca means we can completely avoid meat in this product, so every Denti is a green miracle that takes care of your dog's teeth and is also well tolerated by sensitive pets. Ready to save the planet AND your pet's teeth? Off we go!

- The best of both worlds: sustainability and dental care combined.
- Clean teeth: cellulose supports everyday dental hygiene, the star-shaped design helps massage the gums.
- Veggie on four paws: vegan, grainfree recipe.
- Climate-positive: through our forest conservation project in Tanzania, we offset 125% of our CO2 emissions.
