

S O F T W A R E

Your Isolated Workstation Is Just One Swipe Away

Choose the only Type 1 hypervisor running multiple
isolated environments locally without UX compromise

✓ Privileged acces workstation

✓ Isolated development environments

✓ Restricted or regulated endpoints

✓ IT / OT convergences zones

★★★★★ Trusted by the most critical organizations for their most sensitive use cases

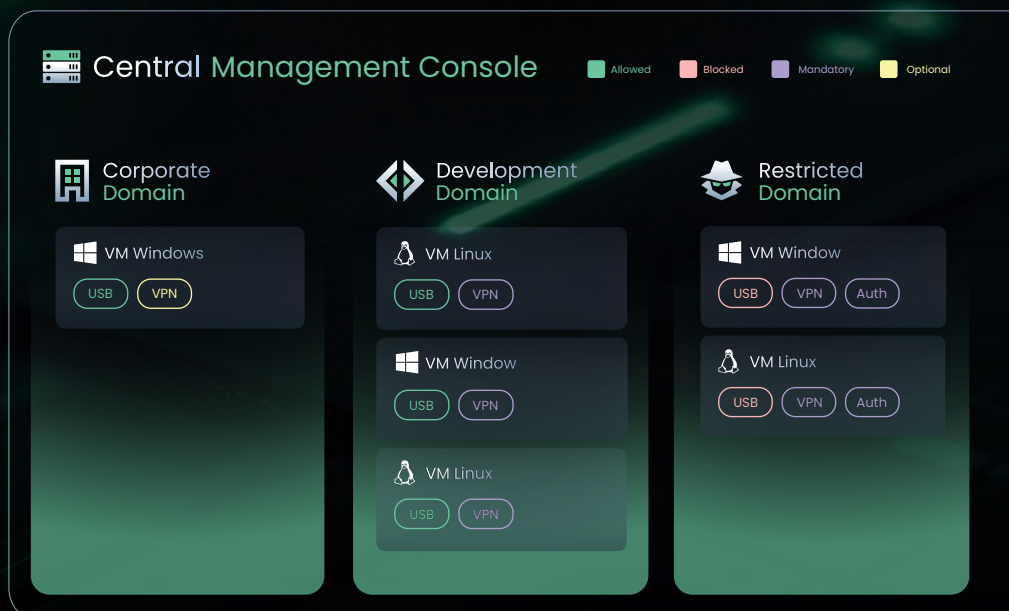

Isolate with Full Performance

Most security tools slow everything down. YS::Desktop doesn't. It creates fully isolated environments that block side-channel attacks while keeping every workload running at native speed

Manage Everything Centrally

YS::Desktop gives IT teams a single interface to define, deploy, and manage all security policies across every domain and every endpoint in your fleet

Enable Network Freedom

YS::Desktop gives you control over how each VM connects. On the same workstation, choose if VMs stay behind the host IP or get their own network IP, with or without VLAN tagging
