Palisade slat panels

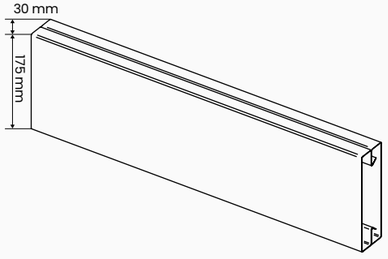

The **Valor®** palisade slat is the answer to one of the most popular trends in fencing architecture. An aesthetic value comes in pair with high durability. The fence panels are made of heavy-duty thickness with a highly durable polymer coating finish. Unlike fences made of black steel, this product requires no represervation or repainting. This way your fence will look like new for longer.

specifications

height	**175 mm**
depth	**30 mm**
length*	**1950, 2450 mm**
thickness	**#0,7 mm**
colour	**graphite**
finish	**matt**

*500-2500 mm available on request

Rectangular slat panels

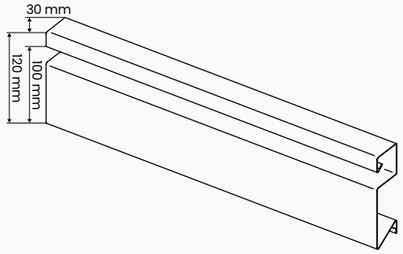

The **Valor®** rectangular slat panel fences are a perfect fusion of the traditional louvre pattern with a palisade fence. With its simple, minimalist geometry, the fence gives a sense of modern styling and great aesthetic appeal.
Unlike traditional fences, it provides an excellent barrier against road dust and noise. Another added value is the protection against the prying eyes of neighbours and pedestrians passing by.

height	**120 mm**
module panel height	**100 mm**
depth	**30 mm**
length*	**1950, 2450 mm**
thickness	**#0,7 mm**
colour & finish	**graphite; matt**

*500-2500 mm available on request

Diamond slat panels

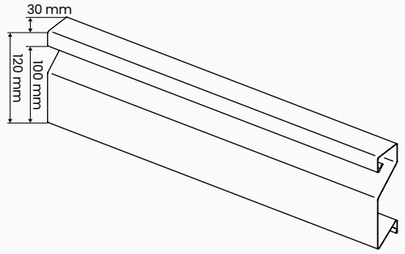

The **Valor®** diamond slat panel meet the demand for merging the advantages of louvre and palisade fences into one product. The slanted slats help the fence panels to shed dust and dirt. There is more - this fence perfectly muffles sound so you can ejnoy a bit more peace and quite.

Valor® installation kits

The **Valor®** installations sets allow to fit fence pannels with all types of posts - masonary units as well as steel posts. The channel posts are stamped specifically for easy assembly and installation.
With our instalations sets, panels can be installed into already existing posts - it's quick, easy and minimises the risk of misallignment errors.
The whole fence assembly is finished with decorative sight slats and neat plastic caps.

secure & convenient

Palisade slat panels

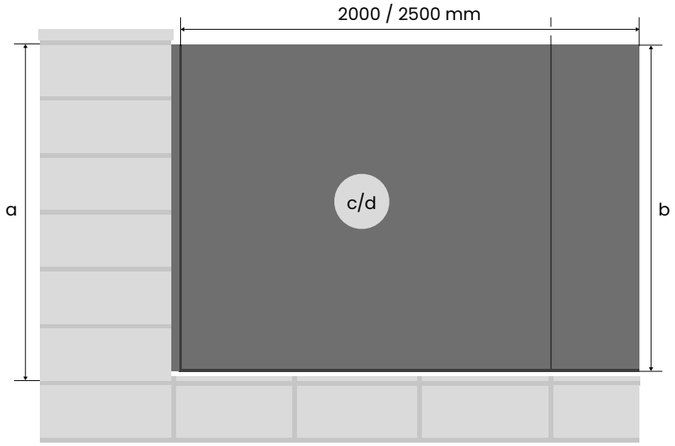

specifications of the Valor® installation kits

length	**720, 920, 1120, 1220, 1320, 1420, 1520, 1720, 1920 mm**
channel profile	**50 x 50 mm**
sight slat colour	**graphite**
sight slat coating	**matt**

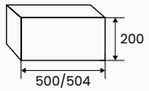

Fitment between masonry fence posts

The **Valor®** fencing system is designed to fit most common fencing systems already available.
The slat lenghts are alligned with most popular systems that use masonary units.
This helps to install the fence quickly and without problems.

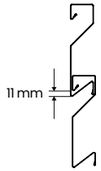

masonry units

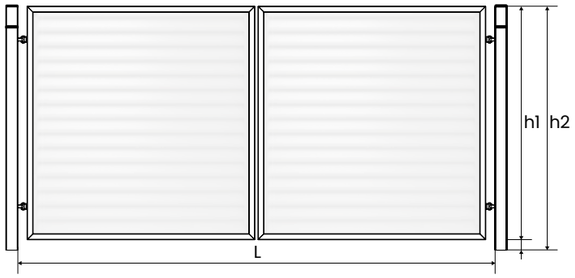

key	a	b	c	d
a - number of post units	**7**	**720**	**7**	**3**
b - channel post height [mm]	**5**	**920**	**9**	**4**
c - number of panel slats [pcs.]	**6**	**1120**	**11**	**5**
c - number of palisade slats [pcs.]	**7**	**1320**	**13**	**6**
	8	**1520**	**15**	**7**
	9	**1720**	**17**	**8**

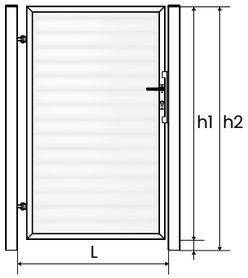

Filling in gates

The **Valor®** fencing system allows installing its slats to fill in entry gates and garden gates. The louvre slats can have the spacing adjusted within 11 mm. This way they are easy to fit most standard sizes of gate and walk door panels. The palisade slat spacing can be adjusted as required.
The slats can be ordered in a custom length to match the panel width.

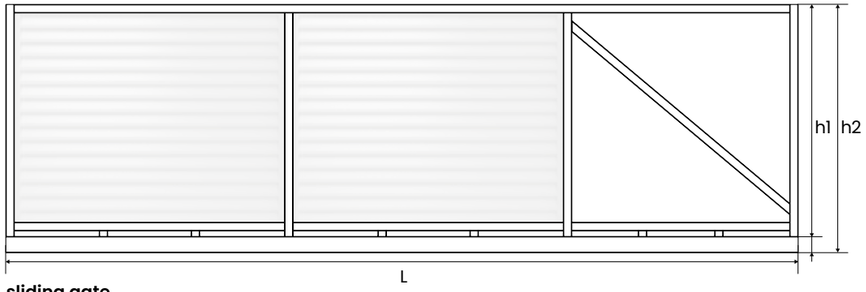

double gate

walk door

sliding gate

h1 - gate leaf height | **h2** - min. fence height | **L** - post spacing

The **Valor®** fencing system is a comprehensive solution for installing panels to fence off a property, as well as filling in entry gates. It is for everyone who seek comfort and security. The system provides a consistent look and feel with convenience of use for many years.
