

One of the biggest aluminum die casting &
CNC machining companies in Baltics

Value proposition

Logistics

High shipping costs, lengthy times, customs complexities and potential duties as well as quality control risks

Shorter supply chains

European companies are opting for more localized and streamlined processes

Relocation

Relocating aluminium die casting & CNC machining operations to ABF LT in Lithuania

Savings

Reduced costs & greenhouse gas emissions increase the competitiveness of our customers

ERP SYSTEM

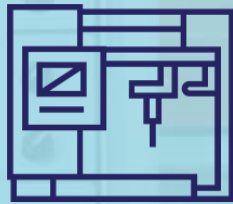

ALUMINIUM DIE CASTING

4 automated high-pressure die casting machines with injection force from 350 to 1000 tons.

Component weight from 20 g to 15 kg with maximum casting projection of 1600 cm².

CNC MACHINING

10 CNC turning centers that can manufacture max diameter of 300 mm and 500 mm in length.

16 CNC milling centers with a 3-4 axis and maximum working size 900x500x450 mm.

TRANSFER MACHINING

Witzig & Frank and Riello multi-spindle rotary transfer milling machines can produce large batches in relatively short cycle times. Capacity ranging from 20k to millions of pieces.

SURFACE TREATMENT

RÖSLER continuous flow vibratory finishing system.

Robotic grinding and polishing cell as well as shot blasting camera in house.

Aluminum anodizing and steel galvanization carried out at subcontractors.

Vision & sustainability

To constantly grow our presence in the Baltic States and Scandinavia and become the go-to supplier of aluminium die casting services, renowned for quality and service.

Why choose us

1 ALL-IN-ONE

Die casting, CNC or rotary transfer machining, surface treatment, packing and transportation can be offered all-in-one place.

2 SHORTER SUPPLY CHAIN

Being close to Western Europe and Scandinavia we can assure that products will reach our customers' warehouse in reasonable time.

3 FLEXIBILITY

Reaction speed is essential in preparation for new & existing projects. We are flexible in setting up dies & CNC tools to start the production.
