

Square all-fibre drums:

GREEN DEAL

- 100 % Reusable
- 100 % Recyclable
- 100 % Circular
- 100 % CO2 neutral
- 100 % Bio Based
- 100 % compostable
- 100 % natural raw material FSC
- 100 % food safe

A product of nature with extreme CO(2)ST reduction

- the square all-fibre drum is 100 % bio based and ecological circular,
- made out of 100 % FSC paper. Now, and in the far future: never a waste problem for empty drums, re-usable many times and easy recycling on the end of use,
- CO2 neutral,
- Resy certification (the classical round fibre drum doesn't have a Resy certification) and PAP-21
- fully comply with EG 94/62/EG packaging regulations (the classical round fibre drum doesn't),
- no more metal parts, so no more risks of:
 - a) human injuries,
 - b) small metal splinters out- and inside the drums,
 - c) traces of grease (lubrications for metal forming)
- food proof for direct contact, there is even a Pharmacopoeia declaration on our inliners,
- logistical savings up to 80 % (in production, warehouse and transport),
- much safer in intern- and extern transport because of full wall contact between the drums (round drums: only 2 small contact points),
- drum can pass through a metal detector.
- highest UN certification Class X (packing group 1,2 and 3),
- new revolutionary UN certification, client is completely free to use their own desired closure system,
- fully comply with all international packaging regulations,
- we purchase: 1.000 ton fresh virgin paper FSC / year for making drums
we purchase: 12.000 ton recycled paper / year to be re-used for making paper cores
No recycled paper without fresh fibre ♻️.
