

# Precise Package Tracking Elevate Logistics Visibility

## UT3 Printable Asset Label

UT3 is a smart logistic label designed for package. Utilizing soft and environmentally friendly material, it offers significant flexibility – easily bending to fit irregular surfaces. Its 1.2mm ultra-thin design enables it to effortlessly attach to different packages. UT3 is compatible with general anti-metal printers, highly enhancing working efficiency and eliminating the need for extra specific equipment. It can be activated directly via RFID while printing shipping information by printers. Its attributes to achieve environment protection and smarter tracking make it ideal in various logistic applications.
