INDONESIAN ORNAMENTAL FISH & CORAL EXPORTER

CV. CORAL INTERNATIONAL
www.cvcoralinternational.com

About Us

Coral International was founded 20 years ago. We are the biggest company in Banyuwangi and Bali. We have been striving to provide world-class service and highest quality ornamental marine livestock from the coral reefs of Indonesia. We are certified member of Indonesian Coral, Shell and Fish association

We always support for new developments, legal trade of live corals, trade link and export license CITES for coral since 2015. Coral International focus to lead the global market of ornamental marine livestock through high-end innovative and reliable products, high-tech equipment, and talented people. You can choose our products through our collection of photographs. We are gladly inviting our customers and prospective customers to make appointment and visit us whenever you are in the area.

Our mission is your procurement partner for marine needs. Our goal is to deliver exceptional coral, invertebrates and fishes globally with excellent service. Its our dream to make marine corals easily accessible worldwide regardless of geographical location. We bring to the world a collection of diverse and unique corals of Indonesia Sea. We deliver quality marine products at affordable prices. We acknowledge volatility nature of ocean is influence by businesses. Coral International take considerable time, effort and investment to develop sustainable marine conservation program.

We are committed to minimize environmental impacts from our operation. We initiate proper aquaculture, coral propagation and good reefing practices with environmental benefit in mind. Our ocean farm is solely established to propagate corals. We fragment it by breaking small part of corals and plant it as a seeds on customs base plug along the reefs. We leave it overtime to grow and collect it once it becomes individual colony. We are one of the first companies to invest in sea culture farming at nearby remote island. This system will facilitate propagation, plantation and growth of corals directly from ocean. We set long term goals in all our actions to achieve sustainable business to local seas. We recognized our responsibilities grow as our business expands, considering impact of our actions is an essential part of our operation that made us different than any other exporters.
