Qevlar AI

qevlar.com

Scale your investigation capacity, not your headcount.

up to
80%
of alerts closed automatically

under
3min.
average time to investigate alerts

24/7
non-stop investigations with consistent quality

Expand analysts' capacity

Let your analysts handle the most complex investigations and focus on proactive security measures.

Achieve the consistent quality of alert investigation

No matter how many alerts, what time of day, or what type of threat, every signal (even the weakest) is investigated end-to-end.

Integrate in your SOC environment

Qevlar integrates with SIEM, TI, EDR/XDR, and other security systems in under a few hours. Our fastest implementation so far: 10 minutes.

> *"The ROI was immediate, with lower operational costs and stronger security."*
> Director of Cybersecurity | Sodexo

> *"Qevlar began with email security and proved so effective we expanded it across our entire security perimeter."*
> Daniel Aldstam
> CSO | GlobalConnect
