

BC200/BCE300 BAG CLOSING MACHINES

Do you want to close bags reliably and quickly?

We offer you the right selection for your application.

Depending on the level of automation and bag material, we can offer you the right machine with the right accessories.

● Sturdy ● Reliable ● Efficient ● Fast

BC200 Bag Closing Machines

The world's fastest bag closing machine, which reliably maintains high speeds in continuous operation. Thanks to the completely enclosed housing and internal oil pressure lubrication, consumption of wear parts is reduced compared to open or semi-enclosed models.

This machine class should be your first choice if you have to handle bags of at least 5 kg at conveyor belt speeds of 17 to 33m/min.

Generally, we also recommend this class for closing bags of bulk materials such as sugar, fertilizers and materials that become a challenge for mechanical operations due to buildup or corrosion.

Plain Closure

Fold-over Closure

BCE300 Bag Closing Machines

This is economy version of BC200 class, which of course can benefit from many advantages of the high-end sewing head.

Due to the closed oil system, the machine is best suited for closing bags with food. Since all parts of the drive system are inside the housing, the wear of these parts is very low, which guarantees high durability.

As a special version in this series you will find the world wide only machine which is able to combine an adhesive crepe tape closure with a sewn closure in one model.

(Recommended for milk powder, chemical agents etc.)

Crepe Tape Closure

Self-adhesive Crepe Tape Closure
