

LA-E4S

LockedAir LA-E4S is a business class air cushioning system that produces pillows and bubbles on-demand for void-fill, wrapping and cushioning needs.

Its multi-functionality can fulfill all possible packing needs with high-speed output of up to 59ft/min.

LA-E4S is a simple, fast and reliable machine compatible with films of different materials, shapes and sizes, meeting all packaging needs.

Perfect sealing

- Patented automatic temperature correction ensures perfectly sealed air bags.
- Superior seal technology for wrinkle free sealing.

Excellent inflation

- The inflated air bags can retain air for several months.

Efficient

- Simple to operate, every new or temporary worker can easily operate.
- Instant start up, saves time from start up with no film loss.
- Use together with multiple accessory options, to fit various applications.
- Programmable settings to suit various film options: air pillows, air bubbles, and air tubes.

Versatile film options

- Sustainable material options: bio, recycled and paper based.
- Thickness options: from 0.4mil to 3mil.
- Width options: from 8inch to 31inch.

Compact dimensions

- Saving space portable and perfect to integrate in your pack station.

Applications

Wrapping Void Fill

Cushioning Medium User
