About TIM AG

TIM AG is one of the leading value-added distributors for data centre and security technologies. Founded in 1985, TIM supports system houses as a channel development partner with cross-vendor services for generating new projects, training and further education, sales and marketing – simply and efficiently.

TIM also advises partners on the development of new markets and technologies, the solid establishment of strategic alliances and the sustainable expansion of business.

The company – headquartered in Wiesbaden – has been growing continuously in the D-A-CH region for years.
