Bentonite

Hard Clumps, Low Dust and Natural Odour Control

Grey as a colour represents neutrality and balance. Cat's Grey takes its name from its natural grey colour which is typical for this type of Sodium Bentonites. Its grey colour gives a natural comforting feeling to cats which encourages them to use the litter box. In contrast to other types of bentonites Cat's Grey forms %100 natural clumps maintaining a healthy environment for your cat. Cat's Grey is made of high-quality Sodium Bentonite which ensures strong and instant clumps, ideal for easy scooping leaving rest of the litter clean.

Sodium Bentonite is known for its exceptionally low dust levels. Cat's Grey's low dust formula dust- creates a clean atmosphere for your cat avoiding respiratory problems both on humans and cats.

Cat's grey is made of compact granules which are soft on paws making your cat comfortable in the litter box. Sodium Bentonite minerals has remarkably high odour retention capacity. Compact granules absorb the urine instantly trapping the ammonia odour inside the clump.

Recyclable Packaging

We believe that implementing eco-friendly packaging in our brand's operations is no longer an option - it's a necessity... Cat's Grey uses Recyclable Ldpe which is eco-friendlier and more sustainable optimizing the use of renewable source materials for our bags.

Sensitive

Cats are sensitive animals to smell and their smelling sense is 14 times better than humans. As they are sensitive to smell the use of fragrance can be overpowering their sense of smell. Cat's Grey Sensitive is specially produced without fragrance for sensitive noses. Sodium Bentonite offers excellent odour properties when it comes to odour binding. Compact granules absorb the urine immediately while trapping the ammonia inside the clump. It is hypoallergenic and does not contain any chemicals or additives. Cat's Grey is made of premium quality Sodium Bentonite when effectively used with daily scooping there is no need to use scents or masking agents.

Vanilla & Tangerine

Cat's Grey is gently perfumed with Vanilla Tangerine. The tangerine brings the clean fresh smell of citrus gardens from Tanger while the vanilla's calming aroma relaxes your cat. Compact granules absorb the urine immediately while trapping the ammonia inside the clump.

Cotton Blossom

Cat's Grey is gently perfumed with Cotton Blossom. It is a great scent; clean smelling and soft which brings a clean fresh feeling where your litter box is. Compact granules absorb the urine immediately while trapping the ammonia inside the clump.
