

**In defense against cyber-attacks,
there is no second chance.**

SERPENTEQ
Security is just an Illusion

SERPENTEQ Managed Service for SAP Cyber Security

This service provides tool-based, recurring 360° SAP cyber security monitoring of entire SAP system landscapes at an interval that best suits your purposes.

Our experts review all tool output and provide you with comprehensive mitigation advice:

- Eliminate false positive results and properly rank issues
- Report only qualified & relevant risks
- Support mitigation activities
- Confirm effectiveness of applied mitigations
- Determine root causes of issues for subsequent gap analysis
- Improve processes and guidelines where necessary

As a result, your budget and resources are used where they are most needed.

We also assist in case of a security breach or malware attack.

Outstanding SAP security knowledge since 2003

Our specialists have been working in SAP cyber security since 2003, advising multiple Fortune 500 companies and publishing research at more than 50 conferences, including:

- Black Hat Europe (2011)
- Deep Sec Vienna (2013, 2019, 2023)
- DSAG Jahreskongress (2009)
- Hack in the Box Europe/Asia (2011/2019)
- IT Defense (2013, 2023)
- RSA San Francisco (2012)
- SAP TechEd USA (2004 - 2006)
- Troopers Heidelberg (2011 - 2016)
