About FSP

FSP Group is one of the global leading power supply manufacturers. Since its establishment in **1993**, FSP Group has followed the management conception “service, profession, and innovation” to continuously fulfill its responsibilities as a green energy resolution supplier. With the combination of its leading role in power supply technology and the cultivation of the green energy field, FSP Group now provides more competitive quality products and makes itself the most reliable partner for customers, consumers, and suppliers with joint creation of maximized values.

FSP Power Solution GmbH was set up in 2007 and started serving customers all over Europe in the industrial field. The number of employees increased from 2 to over 70 at the time being, including sales and service engineers, product management, logistics and accounting.
