

Ecosin®

CLEVER FUNGUS

Veterinary preparation

A biological ingredient added to water and utilised either as a water spray or in a water bath. Utilises mycoparasitism to destroy the filamentous micromycetes and fungus on the skin, coat and other areas i.e. hooves and claws. Suitable for:

- The care of skin prone to fungal infections.
- Promoting natural growth of microbial flora on the skin and coat.
- Skin and coats prone to chafing.
- Treating symptoms of thrush in horses.

Instructions for use: Coat/Skin

1. Dissolve 1 effervescent tablet in two litres of lukewarm water (about 34 °C) and let it activate for 20 to 30 minutes.
2. Apply directly onto skin either by bathing animal or via direct spray solution.
3. Allow hair or skin to dry naturally.
4. Repeat steps 1–3 three times a week.
5. Repeat application the following week if necessary.

Once mixed with water, the solution must be used within 24 hours.

Along with the application of Clever Fungus Ecosin we recommend cleaning the area that is in direct contact with the animal (kennel, bed, brush, collar etc.). This will prevent recontamination and speed up the recovery process by reducing the number of fungal spores in the environment.

Instructions for use: Hooves, claws

1. Dissolve 1 effervescent tablet in two litres of lukewarm water (about 34 °C) and let it activate for 20 to 30 minutes.
2. Apply directly to the affected areas either by wrapping the foot or by placing it into a basin/bucket.
3. Leave the foot wrapped for at least 20 minutes.
4. Allow claws and hooves to dry naturally.
5. Repeat all steps 1–3 three times a week. You can prolong the application as needed; there is no danger of overuse.

Once mixed with water, use the solution within 24 hours.

Do not use any other antifungal treatments or disinfection in conjunction with Clever Fungus Ecosin at least 5 days prior and 5 days post treatment.

Storage: Store product in dry conditions at room temperature (15 to 25 °C). Keep the bottle closed. Package disposal as per local regulations.

Warning: Keep out of reach of children.

Shelf life: 5 years

Ingredients: Citric Acid, Sodium Bicarbonate, Sorbitol, Silica, Panicum miliaceum, Pythium oligandrum, PEG 6000, Sodium Carbonate

Packaging: 3 x 3g, 5 x 3g, 10x 3g

Holder of approval decision: Bio Agens Research and Development – BARD, s.r.o.,
Tylišovska 772/1, 160 00 Praha 6, Czech Republic

Manufacturer: RosenPharma a.s., č.p. 265, 664 81 Veverské Knínice, Czech Republic

Approval number of the veterinary product: 057-09/C

Clever Fungus Ecosin

A biological additive to a water spray or water bath that eliminates filamentous micromycetes and yeasts organisms on skin, hair and other skin derivatives (claws, hooves, hoofs, etc.).

- Suitable for care of skin, coat prone to dermatophytic (fungal) and yeast infections
- Suitable for promoting natural growth of microbial flora on the skin and coat
- Suitable for skin and coats prone to chafing
- Suitable for fighting symptoms of thrush in horses

Clever Fungus Dermasin oil

Suitable for combining with veterinary product Ecosin

Suitable for skin and coat care. Especially suitable for dry skin prone to atopic eczema. Helps regenerate small deposits of damaged skin and can be a supplement after application of Ecosin. It softens the skin and thanks to its microflora content favourably affects the defence mechanisms of the skin of mammals, birds and terrestrial reptiles.

Pythie Dog Paw Balm

Softens and treats paws affected by salt or frozen snow, or by walking on uneven surfaces.

Pythie Dog balm is used to maintain the skin of the dog's paws soft and supple.

In case of injury, accelerates the healing process.

Pythie Dog Veterinary ointment

The ointment is beneficial in the treatment of poorly healing surface wounds, minor skin and mucosal injuries, abrasions, insect stings, hard and scaly skin.

Thanks to its composition, it suppresses the growth of bacteria and moulds, soothes the inflammatory reactions, suppresses the itching and smooths scars. It promotes growth of the dog coat and its recovery.

Biomycosin Vet

Biomycosin Vet is a preparation applied in the form of a water based spray or water bath that has mycoparasitic effects in eliminating filamentous micromycetes and yeasts on the skin, hair and other skin derivatives, such as hooves.

It's applied on the livestock by spraying with special attention to the affected areas.

Pythie Dog Fresh Breath

Is composed of unique microorganisms with beneficial effects on the oral cavity. It is suitable for use in the care of gums and teeth in case of tendency to gum irritation and tartar formation, it also refreshes the breath.

Pythie dog ear cleaner

This product is designed to gently clean the external ear canal,

It dissolves cerumen (earwax) and impurities. It helps

protect the external ear canal from microorganisms that can

cause health problems. Relieves irritation. Moisturizes the dried skin of the ear.
