EMS & TACTICAL GEAR

ABOUT THE COMPANY

tqdnipro.com/en

TQ DNIPRO is a leading Ukrainian manufacturer of high-quality hemostatic tourniquets designed for military personnel, tactical medics, emergency responders, and civilians who may encounter life-threatening bleeding situations.

Created out of necessity during one of Ukraine's most difficult times in modern history, TQ DNIPRO tourniquets are the result of a collaboration between experienced engineers, tactical medicine specialists, and combat medics. Their combined expertise has resulted in the creation of a tourniquet that is not only highly effective but also intuitive and reliable in high-pressure situations.

Having been tested in real combat scenarios and numerous field trials, TQ DNIPRO Gen 2 tourniquets are designed to withstand extreme conditions, ensuring rapid and reliable hemorrhage control. Each tourniquet undergoes more than 10 stringent quality control checks, adhering to the highest international standards, including NATO Stock Number (6515-61-017-6778) and EU certifications.

Thousands of military personnel, first responders, and medics depend on TQ DNIPRO tourniquets every day—whether in active combat, tactical training, or emergency medical situations. The quick application, durability, and effectiveness of these tourniquets make them an essential part of any first aid kit.

TQ DNIPRO - Designed to save lives!

MANUFACTURED IN UKRAINE

Supporting a Ukrainian manufacturer is a contribution to the country's economy and job creation.

HIGH QUALITY

TQ DNIPRO tourniquets are certified and comply with strict European standards.

INNOVATIVE TECHNOLOGIES

Continuous quality improvement and implementation of innovations to enhance safety levels.

FLEXIBLE COLLABORATION TERMS

We offer special terms, ensuring maximum benefit and convenience for our partners.

QUICK ORDER PROCESSING

We guarantee quick and reliable order processing, with timely dispatch for both domestic and international deliveries.

SUPPORT AT EVERY STAGE

Our clients receive personalized service and continuous support at every stage of cooperation, enabling us to build long-term and mutually beneficial relationships.

TESTING OF TQ DNIPRO TOURNIQUETS HAS SHOWN

ATRAUMATIC

No additional trauma to soft tissues or the neurovascular bundle. Low level of associated pain.

RELIABLE

Maintains the required pressure level and is securely locked against accidental release under load. Operates effectively in extreme climatic conditions.

EFFECTIVE

Ensures complete vascular occlusion and bleeding control. Suitable for different limb sizes, regardless of gender.

FAST

Can be applied to a limb with one hand. Compression is achieved from the first half-turn of the windlass, stopping critical bleeding immediately.

CERTIFICATES AND PATENTS OF TOURNIQUETS TQ DNIPRO GENERATION 2

TQ DNIPRO™ Gen 2 tourniquets are protected by patents:

Ukraine: No. 151561, No. 152755

European Union: No. EP4514238B1, No. EP4456803B1

United States: No. US12349921B2

The manufacturer holds international recognition and certification:

European Union: Declaration of Conformity and documentation in accordance with Regulation (EU) 2017/745. Both the manufacturer and the product are registered in EUDAMED (SRN: UA-MF-000039898).

Australia: Included in the Australian Register of Therapeutic Goods (ARTG) in accordance with the Therapeutic Goods Act 1989 and Therapeutic Goods (Medical Devices) Regulations 2002.

United Kingdom: Registered with the MHRA in compliance with the UK Medical Devices Regulations 2002, based on EU technical documentation and the EU Declaration of Conformity.

Additional compliance highlights:

Assigned NATO Stock Number (NSN) 6515-61-017-6778

Manufacturer holds an NCAGE code within the NATO codification system

Certified quality management systems: ISO 13485:2016 (Medical Devices) and ISO 9001:2015 (Quality Management System)

DESIGN FEATURES

DURABILITY

Made from lightweight and durable materials that effectively protect the tourniquet from UV rays, moisture, and mechanical damage.

FUNCTIONALITY

The internal intermediate latch securely fixes the turnstile from falling out during opening. It is easy to open if necessary to remove the turnstile, which reduces the time of applying the tourniquet, separating from the "body" of the tourniquet the part with which the hand comes into contact.

The quick opening system of the side flaps together with the valve, which opens completely, provides instant access to the turnstile.

Free positioning of the turnstile with a C-shaped latch.

ATTACHMENT METHOD:

Equipped with a MOLLE mounting system for attaching tourniquets to military, law enforcement, or civilian gear. An additional fixation system allows attachment to equipment without MOLLE compatibility.

KEY FEATURES:

- Hybrid design for tactical and everyday medical use
- Compact form factor with full-access internal layout
- Optimized for fast access and organized medical loadout

CARRYING OPTIONS:

- Adjustable reinforced strap with FAST buckle
- Strap stowable into tactical waist platform

THREE CARRY CONFIGURATIONS:

- Shoulder carry
- Cross-body carry
- Waist / belt carry

FUNCTIONAL DESIGN:

- Large front pocket with Velcro-secured trauma shears retention
- Elastic external pocket with retractor retention loop
- Top flap pocket for medical gloves
- Quick-release fold-out internal panel with elastic loops for medical supplies
- Inner mesh pockets and elastic loops for organized equipment placement
- Full clamshell opening with zipper closure
- Extended zipper pullers with cord loops and polyamide hardware for operation with gloves

SIDE MESH POCKETS:

- Flap-covered tourniquet compartments
- Dedicated marker holders
- Rear panel with soft padding and belt-loop attachment system

MATERIALS & CONSTRUCTION:

- Cordura® 1000D fabric
- Reinforced elastic webbing and durable hardware
- Designed for resistance to UV exposure, moisture and mechanical stress

PURPOSE

SCRATCHES

Watch Protector is intended to prevent scratches on the dial, however dirt and debris can be accumulated in the material and scratch the surface of the watch and dial.

HITS

Even in peaceful life, you may not notice and accidentally break your watch, what to speak of the situations at the front. To prevent such troubles, we recommend using our Tactical Watch Protector.

LIGHT MASKING AND GLARE

If you use a smart watch, then you just need light masking, both for the watch screen and illumination of the sensors. Anti-glare protection is necessary for mechanics and quartz. Our Watch Protector solves both problems.

DESIGN FEATURES

DURABILITY

Made from lightweight and durable materials, 100% polyamide.

ATTACHMENT METHOD

Worn over the watch and secured with a Velcro fastener.

FUNCTIONALITY

Conceals the watch's screen illumination and sensor lights. Protects the watch face from glare and potential damage.

EVACUATION
STRETCHERS

VENDOR CODE:
STE027

COLOR: SAND

SOFT STRETCHER E

DESIGN FEATURES

DURABILITY

Made of water-repellent, durable fabric. The continuous strap running under the stretchers ensures structural strength. All fabric and strap joints are reinforced with strong stitching for additional durability.

ATTACHMENT

Separate leg and chest fastening ensures body stability during transport, minimizing additional injuries from movement and helps evenly distribute the load to prevent shifting during carrying.

FUNCTIONALITY

When unfolded, the stretchers create a flat horizontal surface for convenient transport. Integrated handles maintain the center of gravity optimally, minimizing the risk of tipping and improving stability during movement. Handles allow two or more rescuers to coordinate efforts, maintaining balance and control over the injured person.

Handles near the center of gravity reduce physical strain on rescuers' backs and arms.

Proper center of gravity placement makes these stretchers easier to maneuver in confined spaces, enhancing evacuation efficiency.

TECHNICAL SPECIFICATIONS

MATERIALS:

Cordura 1000D fabric - China

Polyamide strap - Ukraine

Fittings - Italy

DIMENSIONS:
