

# INTERNATIONAL SHRINK WRAP SUPPLIER

**TMS Automotive GmbH** has been distributing and processing shrink film for many years in Germany and worldwide for the wrapping of mostly large objects for their transport or for longer storage, both for industry and the private sector, for example:

**Boats and Yachts**

**Wind Turbines**

**Modules and Containers**

**Scaffolding / Building Protection**

**Machines and Vehicles**

**Works of Art / Monuments**

## **Shrink film for the wrapping of large and small objects has numerous benefits:**

- it is cost-efficient
- it protects against corrosion (VCI shrink film)
- it adapts to the object, avoiding abrasion and scratches
- it is absolutely tearproof and resilient
- it is UV-resistant (2 years) and seawater-resistant
- it offers good ventilation, preventing mould growth
- it is recyclable
- it is flame-retardant (B1 standard)

## **Training**

Our experts will be happy to train your employees and explain and demonstrate on site how your products can be optimally protected with shrink wrap. This training usually only takes one day.

## **Service**

Our well-trained staff will wrap your systems, boats/yachts, engines and/or their components, tanks, wind turbines, room modules, monuments, scaffolding, etc. with great care and in accordance to your requirements for a safe transport or long-term storage without any damages.

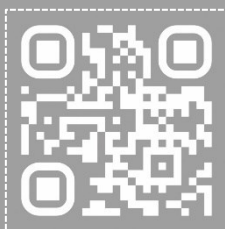

For certain objects - such as modules or containers - we can also prefabricate shrink-wrap covers (made according to your specified dimensions). This simplifies and reduces enormously the packing time.

## Customer Advice

We will be happy to answer all your questions relating to shrink film and its processing and advise you on your individual projects.
