

Carton blanks directly from the pallet

TLM CARTONING MACHINE WITH NEW INFEED TECHNOLOGY

THE PROCESS:

YOUR BENEFITS:

More performance

- Feeding of carton blanks directly from the pallet
- Erecting unit with an output of up to 60 cartons/minute
- Continuous operation with one pallet load for up to 4 hours
- Integrated buffer system enables the change of pallets on-the-fly
- All types of flat carton blanks and different cardboard materials
- Easy, fast and ergonomic format changeovers

Higher profitability

- TLM Power Compact: Very compact machine design on a small footprint
- No unnecessary machine stops for refitting
- Low format costs due to fewer and redesigned format parts
- Cost-effective 3D-printed format parts for fast in-house printing
- Cost-effective overall machine setup

Greater sustainability

- Energy savings due to optimised robot movements with Schubert Motion
- Reduced glue requirements through single-lane cardboard erection
- New gluing device ensures 35% less energy consumption
- Reduced CO₂ footprint due to in-house printing of 3D format parts
- Material-saving cardboard sheets developed together with our partner Colordruck
