

**Sustainable packaging  
solutions for industry**

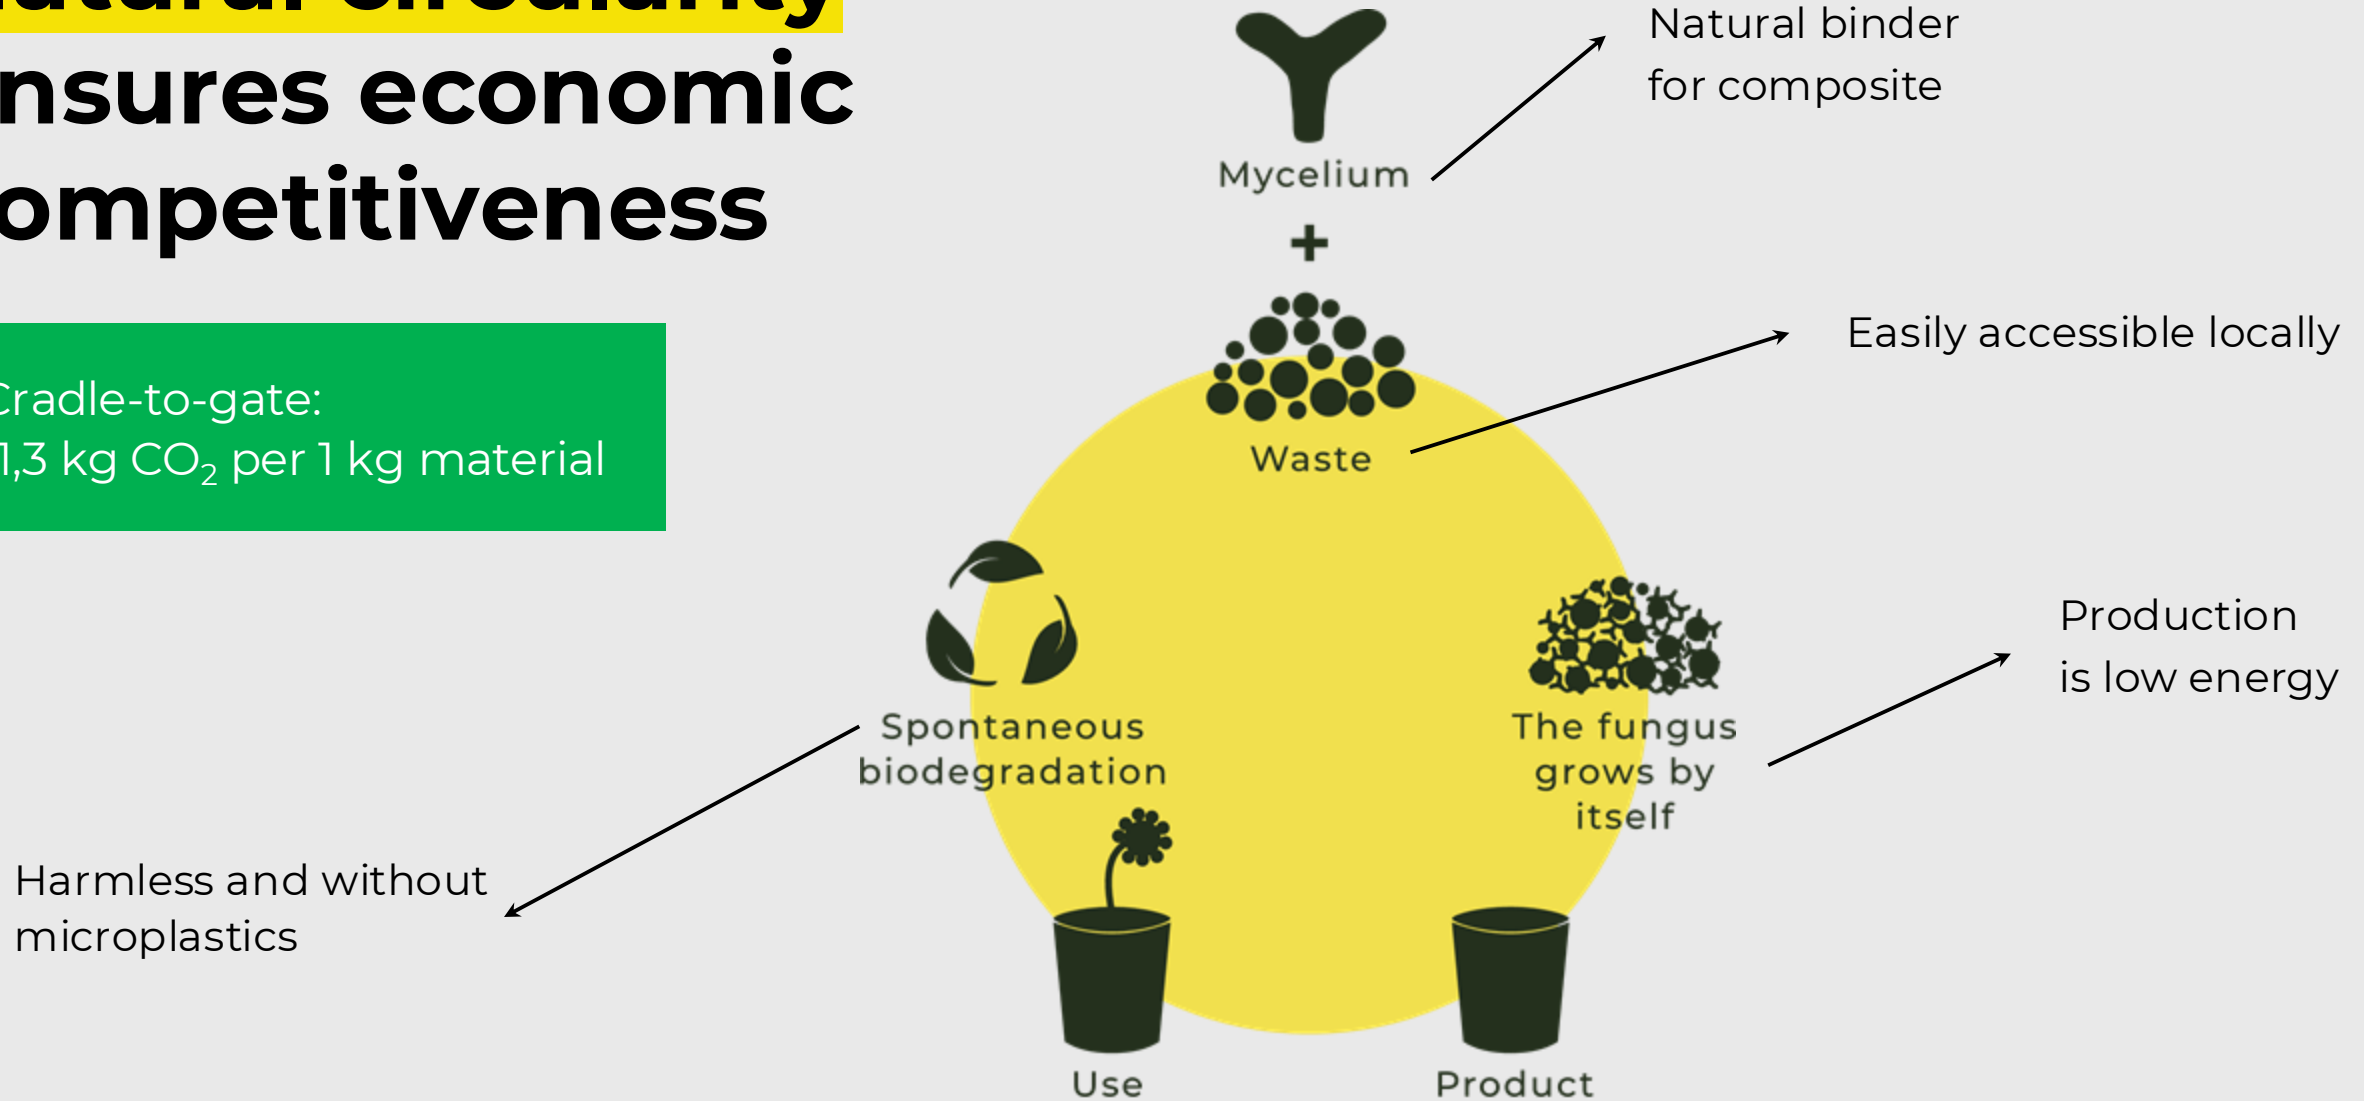

# But we have some **advantages**

# Natural circularity ensures economic competitiveness

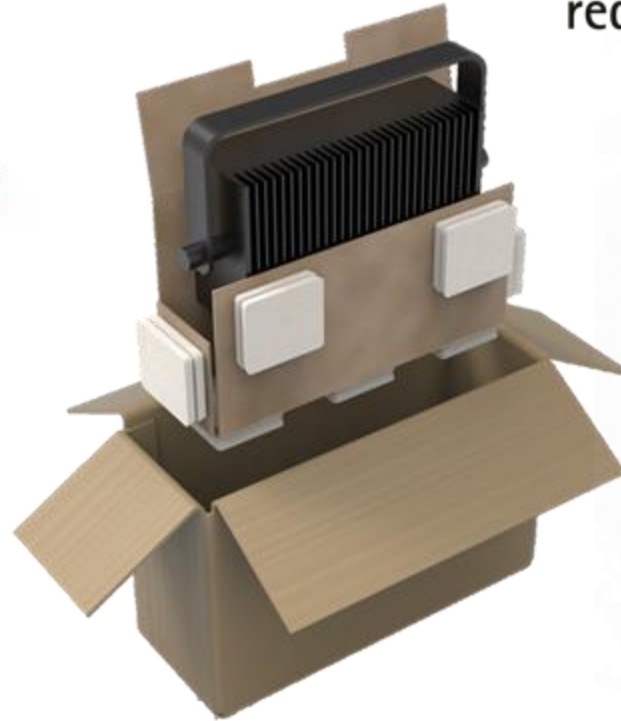

Cradle-to-gate:  
-1,3 kg CO<sub>2</sub> per 1 kg material

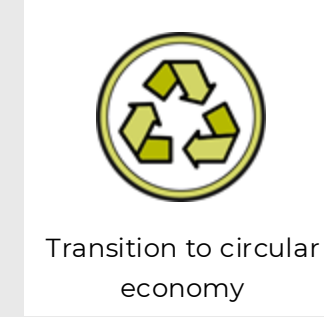

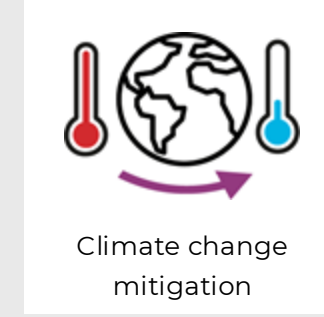

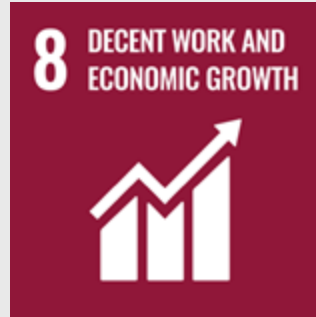

# We'll wrap it just like plastic

reddot winner 2024

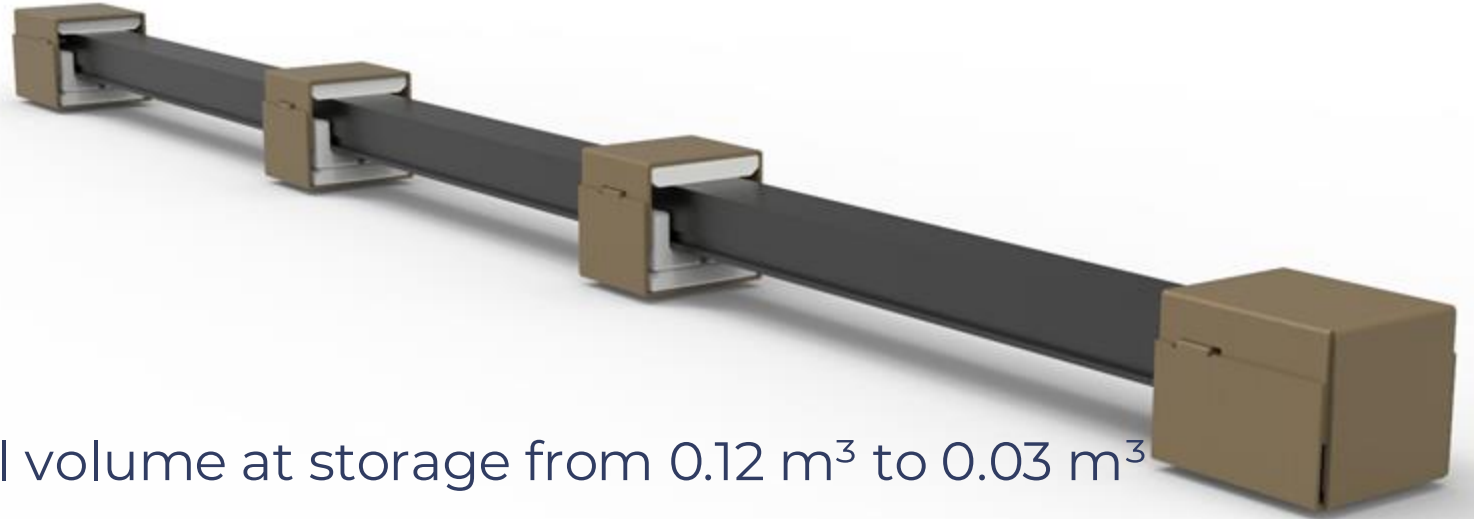

# Helping to meet SUSTAINABLE DEVELOPMENT GOALS

**Biotechnology has recently been included in the Net Zero Industrial Act as a key technology for decarbonization**

# The very first **use case** of Myco 4Pack

CAMEA

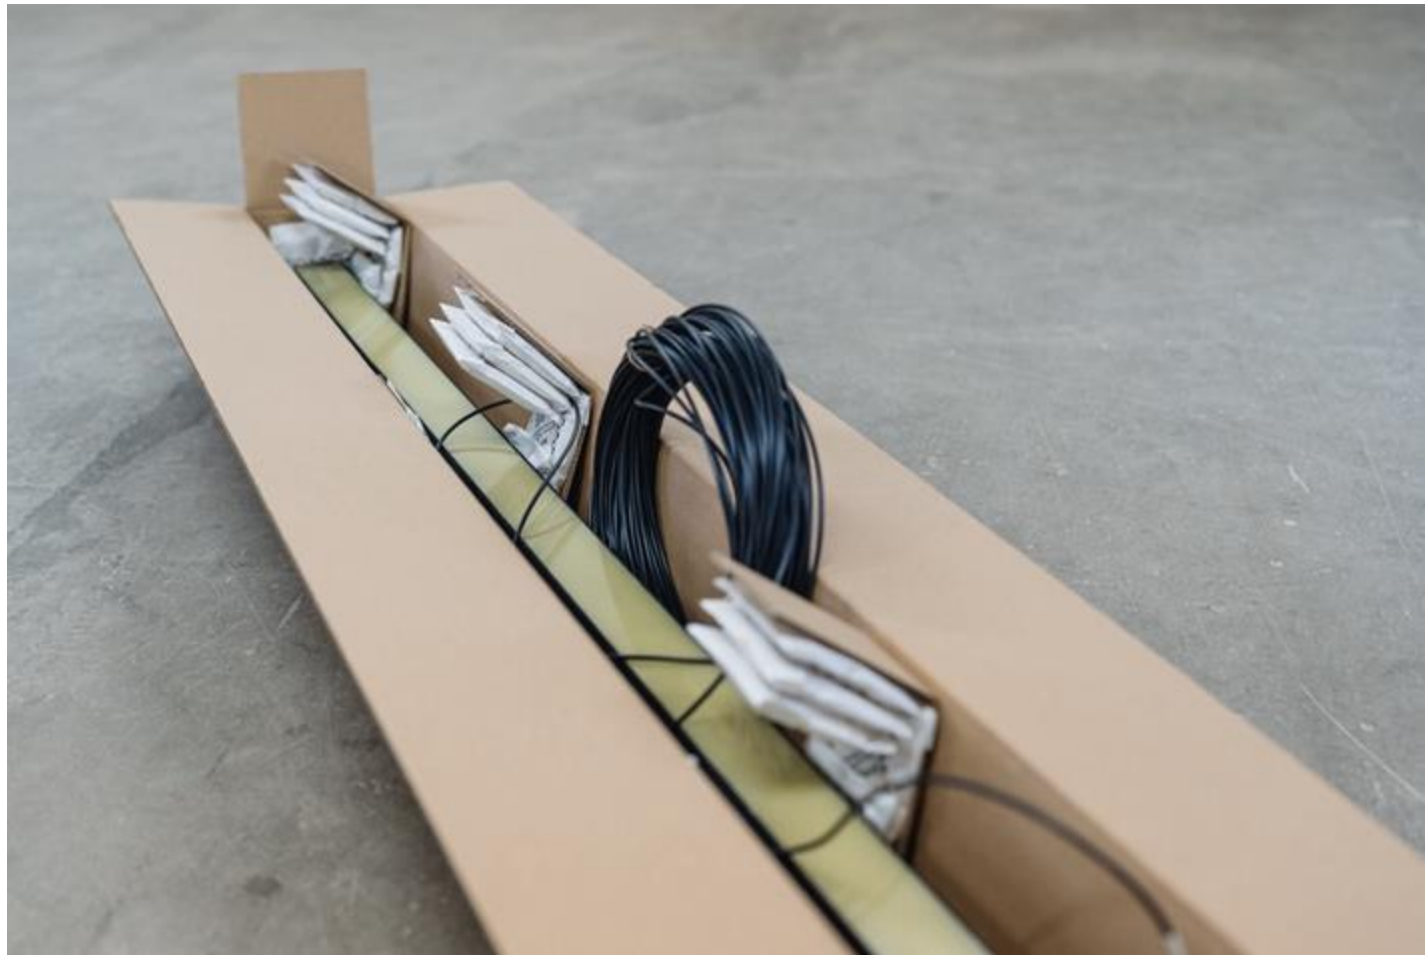

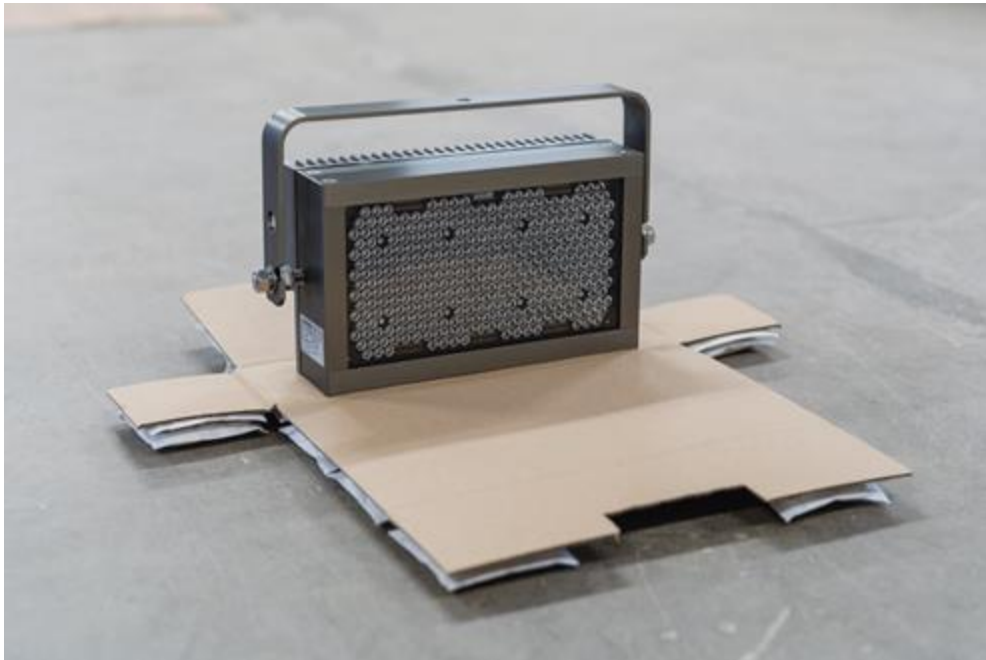

- ✔ Reduction of fixing material volume at storage from 0.12 m<sup>3</sup> to 0.03 m<sup>3</sup>
- ✔ Packaging completely plastic-free with biodegradable fixations
- ✔ Immediate availability of packaging (previously 2 days – cutting, drying, gluing)
- ✔ Easier handling
- ✔ Improved protective properties and design
- ✔ Savings in labor previously invested in own packaging production

**Example  
of the new solution**

**Example  
of the new  
solution**

**Sustainable packaging solutions  
for industry**
