About Us

Barride Optics has been specially engaging in R&D, production of medium and high level optical & electronic items including riflescope, monocular, binoculars, spotting scope, telescope, etc. The company has rich technical capability of designing, strict technological process, perfect quality control system and good after-sale services. All products are exported abroad to serve the requirements of a wide range of overseas clients.

Our company practices ISO9001:2000 quality standard. Our experienced workers and strict inspection system will guarantee that each product has the best quality before shipment. Our R&D team continuously optimizes available models and designs new models to keep our products' competitiveness in the market. We can supply OEM and ODM services.

OUR MISSION is to support our clients by:

Proving competitive product & quick response.

Guarantying the products made as per the requests.

Improving the optical technical and production system.

Keeping clients informed about latest news for the order status.
