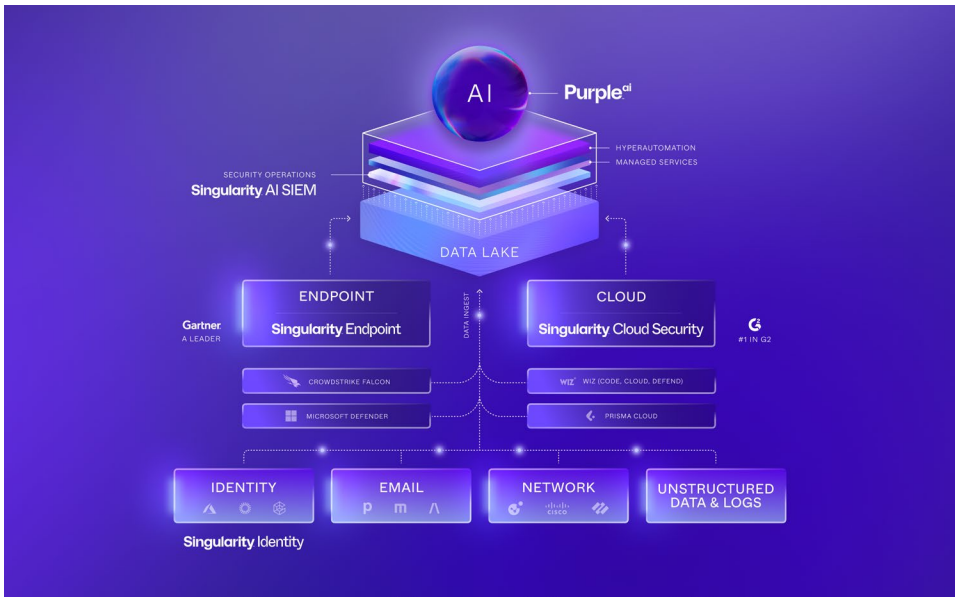
SentinelOne

Singularity™ Platform

The First Security AI Platform to Protect the Entire Enterprise

Addressing threats across different attack surfaces is a huge challenge for organizations. The existence of data silos and disconnected tools result in analysts conducting manual investigations without complete visibility and context. To better safeguard organizations, security teams need comprehensive protection across the entire enterprise.

The SentinelOne Singularity™ Platform is the first AI security platform to provide enterprise-wide visibility and protection, bringing all enterprise data together in a unified data lake to reduce risk and help protect businesses.



Singularity™ Enterprise

The Singularity™ Enterprise solution is the comprehensive foundation to get started with our security AI platform. This platform bolsters and streamlines protection, detection, response, and remediation. It integrates endpoint security (EPP+EDR), identity threat detection (ITDR), threat hunting, network discovery, and the industry's most advanced AI security analyst. With the added benefit of digital forensics, it provides a centralized platform for safeguarding enterprise assets.

Extended Detection and Response (XDR)	The Singularity™ Platform	Centralized platform that augments and extends protection, detection, response, and remediation through seamless integrations across attack surfaces.
Endpoint Prevention, Detection, Response, and Remediation (EPP, EDR)	Singularity™ Complete	Best-in-class prevention, detection, response, and remediation capabilities to simplify endpoint security.

Key Benefits

Unify

Consolidate vendors and agents into one single platform and a single data lake.

Automate

Streamline security operation workflows with industry-leading AI security.

Scale

Scale with a future-proof architecture that will adapt and align with future needs.

Data Retention	90-Day Data Retention	Data retention enhances incident response, threat hunting, and forensics analysis. It ensures compliance, tackles evolving threats, reduces false positives, and aids in swift post-breach recovery.
Identity Threat Detection and Response (ITDR)	Identity Threat Protection	Identity threat detection and response capabilities, makes it easier to prevent advanced identity-born attacks and protect high-value enterprise assets.
Managed Threat Hunting	Wayfinder Threat Hunting	Threat-hunting service targets active global APT campaigns, novel attacker techniques, and emerging trends in cybercrime.
AI Security Analyst	Purple AI	Accelerate SecOps with the industry's most advanced AI security analyst. Translate natural language into complex threat-hunting queries, streamline complex investigations with intelligent summaries of query results, events, and alerts, get deeper insights with suggested follow-ups, and get support questions answered. Scale collaboration and communication across teams with shared and auditable investigation notebooks.
Network Discovery	Singularity™ Network Discovery	Real-time network attack surface control solution that finds and fingerprints all IP-enabled devices on your network, for global visibility.
Digital Forensics	Singularity™ RemoteOps Forensics	Integrated digital forensics solution that automates evidence collection, accelerates investigations, simplifies workflows, and reduces response times.
Onboarding, Training, and Deployment Services	SentinelOneGo[1], S1 University.	Guided onboarding, deployment, and training advisory service with a structured methodology to ensure quick setup and sustained success with the Singularity Enterprise solution. Access to S1 University Online for flexible and efficient training anytime, anywhere.

SentinelOne Singularity™ Platform

The Singularity™ Platform is powered by our Singularity™ Data Lake, ingesting critical telemetry from both SentinelOne native solutions and third-party security tools. Security Operations practitioners can contextually visualize and automatically respond to high-value security alerts with a single cloud-scale repository that offers the greatest retention period and cost efficiency of any vendor in the market.

Innovative. Trusted. Recognized.

About SentinelOne

SentinelOne is the world's most advanced cybersecurity platform. The SentinelOne Singularity™ Platform detects, prevents, and responds to cyber-attacks at machine speed, empowering organizations to secure endpoints, cloud workloads, containers, identities, and mobile and network-connected devices with intelligence, speed, accuracy, and simplicity. Over 11,500 customers—including Fortune 10, Fortune 500, and Global 2000 companies, as well as prominent governments—all trust SentinelOne to Secure Tomorrow.
