## DESIGNING YOUR INSERT

### Header.

Typically it would show your company logo, name and company info.

We will design this for you with your instructions and supplied logos etc., or you can provide print ready digital artwork.

### Body.

You can use this however you like.

Showing people a shot target is always a good idea.

Anything required for your country or region could be placed in this area.

### Footer.

We need this area for UPC code and product description.

The top 2/3's of the insert are standard and will be used on all of your inserts. The bottom 1/3 is used for our description, image and UPC code. Your artwork should be 10x10 cm with 1.5 cm bleed in each direction if you supply artwork. CMYK, 120 dpc saved as a pdf.
