

# Quality Ornamental Fish from Indonesia

Our vision is to deliver Indonesia's most beautiful and exotic ornamental aquatic species ( fish, crustaceans & molluscs ) alive and in great health to our customers worldwide !

We currently export over 300 different freshwater aquatic specimens originating from the Indonesian archipelago.

This was made possible by developing our own network of quality breeders and experienced nature fish collectors around Java, Sumatra, Borneo, Sulawesi and Irian Jaya which covers almost all of Indonesia.

Our facilities was built on 4,000 m2 of land with over 700 aquariums to recreate the different water requirements depending on where each specimen was collected.

Our staff are regularly trained on matters of fish disease, fish nutrition, fish habitat and fish husbandry.

Synergistically allowing our customers to have "Quality Fish ready to sell straight from the box !"
