

Stay Cool, Save the Planet The Cooling Revolution Technology

Cooling Effect

40°F lower than
room temperature

Safe Materials

The cool gel made of
food ingredients

Non Toxic

No mold,
No skin irritation

Eco- Friendly

No microplastic,
Nature's cool

Patented Technology

Korea and the world's
patented technology

Brand Story

OCEAN FLOW. Inc is a company develops various cooling products such as cooling mats, cooling bands, and so on using the US FDA approved eco-friendly raw materials.

Motivation for development

The Most of cooling products are made from polymer gel, which is the main culprit of microplastics. We have decided to operate the business to avoid polymer products that have harmful effects on the human body and the environment and to increase the use of Eco-friendly products.

100% Made in korea

Technology of OCEAN FLOW developed and made in Korea. Also, 100% manufactured through domestic production lines.

Sponsorship

OCEAN FLOW sponsors some of it's proceeds to NGOs every year. We will make better products so that consumers can use more eco-friendly products and lead them to use eco-friendly products.

Customer reviews

4.8/5

This thing is really cool!

I can't believe how cool this mat actually feels! I think it's really amazing and the gel inside it makes it very comfortable for your pet to lay on.

Terrific cooling mat

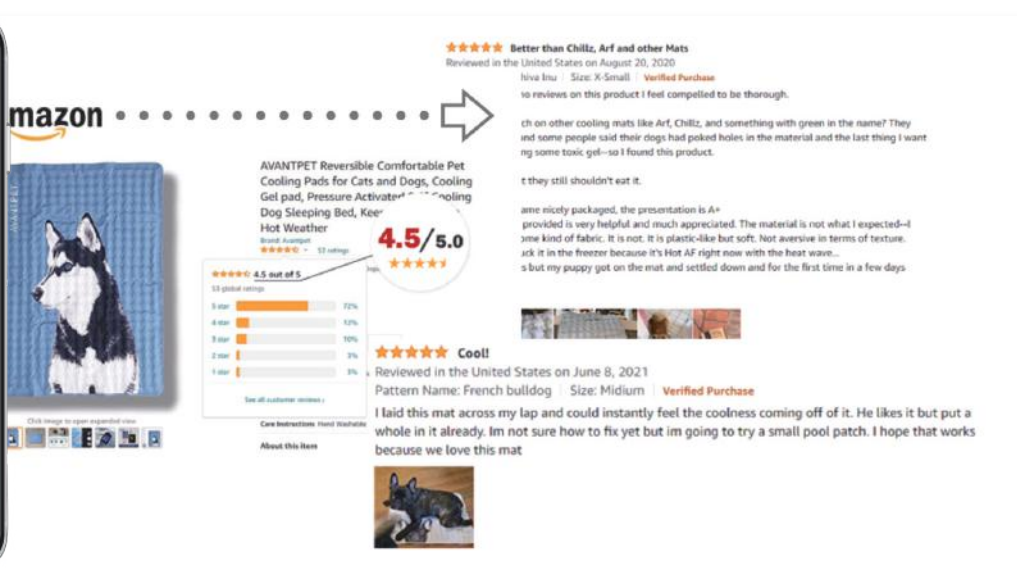

No fault of the mat - it's a nice quality, and does indeed have a cooling effect when held to skin, our particular pups just don't seem to care.

High quality & Safe materials! 👍

I read many reviews for different brands' and decided to go with this one. FDA approved material. This was the biggest reason why I bought this one. I wanted the most safe option for my dog.

Really feels much cooler than the room!

I can definitely feel it several degrees below the ambient temperature. I just put it on the floor, with no need to put it in the freezer or the fridge. She loves it!
