

AQUA CLAY 360

PET FOUNTAIN

pure, flowing water for a healthier life

The Aqua Clay 360 is a ceramic pet fountain designed to promote healthier and more natural hydration for dogs and cats. Its material helps keep water cooler and fresher, while the activated carbon filtration system reduces impurities, odors, and unwanted substances.

With a continuous 360° water flow, a low-energy submersible pump, and USB power supply, it offers practicality, safety, and encourages pets to drink more water daily. It can also be used by dogs in a water circulation mode, keeping the flow gentle and controlled to avoid wetting the fur. Its functional design ensures easy cleaning and supports overall pet well-being.
