## Deshedding onesie

Our deshedding onesie is designed to gently contain loose fur, helping reduce shedding and minimize allergens in your home. It keeps hair off your furniture and floors while helping prevent mats and tangles for a healthier-looking coat. Made with breathable fabric for all-day comfort, it allows airflow to the skin so your dog stays cool and relaxed. Less mess, easier grooming, and a cleaner home — all in one cozy solution.

## ABOUT MAXIMUS

Meet Maximus – our brand-new adaptable harness. This harness is unique because it can be worn two ways. On one hand, the harness can be used on its own for safe and durable walking protection. On the other hand, it can be used in conjunction with select qualifying winter jackets. While extremely functional, it is equally as robust. Made with reflective prints, metal rings for safety, and a plastic slider for extending or tightening, it truly has it all (and in two colors may we add!)

# MADE FROM OCEAN WASTE

We believe every toy can do more. Our ocean waste collection turns discarded marine plastics into playful treasures for our pets—keeping the planet clean, one pounce at a time.

## STEP 1

Collection of discarded PET materials: This includes discarded plastic bottles, containers, and other packaging materials. These waste materials are processed to remove impurities and contaminants.

## STEP 2

Crushing and melting: The recycled PET materials are crushed into small flakes or pellets, which are then melted at high temperatures to achieve a molten and malleable state.

## STEP 3

Filtration and spinning: The molten PET is filtered to remove impurities and then transformed into filament form through a spinning process.

## STEP 4

Weaving and processing: The filaments are woven into fabric and undergo dyeing, finishing, and other processing steps to achieve the desired performance and appearance characteristics.
