

The complete connectivity solution for your business

# 1GLOBAL IoT

One single roaming agreement for your worldwide IoT fleet – tailored data plans covering 600+ cellular networks in 190+ countries.

## A unified global IoT service

### Global Core Network

1GLOBAL connects millions of devices via a single, worldwide network built for IoT.

### Total Reliability

Multi-IMSI technology for optimal availability of leading networks in 190+ countries.

### Expert Control

Fully GSMA-accredited RSP platform for total-lifecycle eSIM management.

### Hyperscale

Flexible and transparent pricing for limitless scalability including 2G, LPWAN, LTE-M & 5G.

## Turn your IoT connectivity into a single, governed and scalable business asset

- ✓ Smart failsafe network switching
- ✓ Futureproof scalability on-demand
- ✓ eSIM-enabled end-to-end security
- ✓ Pre-paid or post-paid
- ✓ Regional and global coverage
- ✓ Single point of contact for every region
- ✓ Standardized terms and Service Level Agreements

1GLOBAL IoT intuitively eliminates accounting, IT and logistical overheads.

# Flexible IoT Connectivity Plans

Choosing a data package to suit your business needs is vital. This is why 1GLOBAL offers tailored solutions with flexibility as standard.

## World Plans (available across all data plans)

Prepaid for low-traffic devices with global flat rates, individual plans with fixed allowances and durations, all managed via your 1GLOBAL Portal.

## Pay-as-You-Grow Plans

Paying only for the data used with no hidden costs, and low monthly fees per SIM that can be flexibly activated or suspended.

## Shared Bundle Plans

Shared fixed-price data pooled across all your connections, upgradeable on demand.

## Shared Flex Plans

Fixed monthly price and data per device, pooled and flexibly adapting for each one added or suspended.

## Manage with ease with our IoT Connectivity Management Portal

### Easy Integration

All data points accessible via easy API integration for intuitive control.

### Granular Management

Administer SIMs, usage, subscriptions, full lifecycle and billing levels.

### Worldwide Tracking

Insights into fleet usage and SIM location via on cell triangulation.
