Suitable products and industries for thermoforming packaging

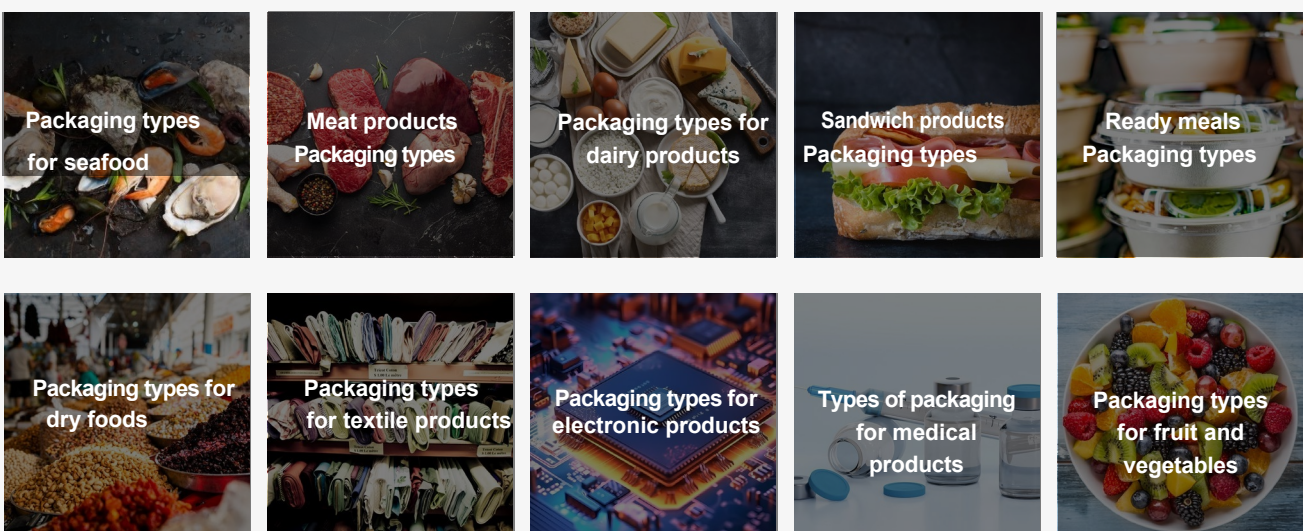

The fully automatic vacuum and MAP thermoforming packaging machine of the W series is a versatile solution that meets a wide range of requirements, performs all packaging processes, and extends the shelf life of products.

It can be used in many different industries – for example, for packaging dairy products, bakery goods, meat products, medical items, ready-to-eat meals, as well as dried fruits and vegetables.

Additional functions can be integrated, such as a cross-cutting unit, inkjet printer, labelling systems, inspection systems, and weighing units.

Packaging applications

TECHNICAL DATA

CYCLE	8-12 CYCLES/MINUTE
INCREASE	max. 450 mm
WIDTH OF THE FILM	360, 420, 460, 520, 600 mm
SUITABLE FILM MATERIALS	PA+PE / PET+PE / PVC+PE / XPP
CONTROL PANEL	7" TOUCH COLOUR SCREEN
AUTOMATIC CONVEYOR BELT	SPEED ADJUSTABLE WITH SERVO MOTOR
BOTTOM FILM	SOFT FILM AND HARD FILM
UPPER FILM	SOFT FILM, PAPER
PRINT	UNPRINTED, WITH PHOTO CELL OR CONTINUOUSLY PRINTED
OUTER BODY	STAINLESS STEEL AISI304
WARRANTY	2 YEARS
CERTIFICATE	CE
