Industry

- protecting goods
- attractive product packaging
- safe, secure shipping

The Industry requires personalised packaging.
We offer tailored solutions!

NEW!

Recycled film packaging

Our recyclate finds a new use in our bags and has already undergone a process.

In terms of price and sustainability, recyclates bridge the gap between fossil-based and bio-based plastics.

The growing interest in sustainability among the population is no longer only reflected in the purchased primary product itself, but also in secondary products such as packaging.

As a packaging professional, you are taking a high level of responsibility with our recyclate bag and communicating this through our

"recyclate logo on each bag, all the way to the end customer.

This will ensure that the **consumer's need for environmental awareness** is met.

As specialists, it is our responsibility to provide **resource-efficient impulses** and to provide the right answers and products to optimise the use of resources.

You too can make a difference with our recycled bags!

PRODUCT BENEFITS

- reclosable ziplock bags
- sustainable - environmentally friendly
- resource-efficient
- flexible & durable
- transparent material
- with green rLDPE sign
- great value between fossil-based and organic-based plastics
- custom made (size, thickness, material, individual print) on demand

rLDPE Ziplock Bags

Reclosable ziplock bags made of 50 % recycled LDPE (rLDPE) to keep and protect small and spare parts.

- 50 mic
- rLDPE
- transparent

	107.142		300x400+50	1.000		1.000

PRODUCT BENEFITS

- ▶ safety lock – permanent adhesive (opening damages bag)
- ▶ adhesive tape ensures easy closing
- ▶ opaque, multilayer coex-foil (outside white - inside black)
- ▶ high tensile strength
- ▶ made of 100 % recycled material
- ▶ tear resistant thanks to coex film
- ▶ lightweight
- ▶ custom made (size, thickness, material, individual print) on demand

rLDPE COEX Adhesive Tape Bags

Permanent closable tape bags made of coex foil to keep and protect textiles, folders etc.

- ▶ 50-60 mic
- ▶ rLDPE Coex-Foil
- ▶ safety lock
- ▶ opaque
- ▶ permanent

Ideal for securing products on pallets. Available in various thicknesses in transparent and black for the hand dispenser and in transparent for the machine.

▶ Hand Roll Film ▶ transparent / black	Item no.		width	colour	type	per box
	500.000		500 mm	transparent	20 mic	6 rolls
	500.013		500 mm	transparent	recylate, 17 mic	6 rolls
	500.015		500 mm	transparent	17 mic	6 rolls
	500.016		500 mm	transparent	23 mic	6 rolls
	500.035		500 mm	opaque black	23 mic	6 rolls
	500.037		100 mm	transparent	narrow roll, 23 mic	6 rolls
	500.001		500 mm		dispenser	1 pcs.
▶ Machine Roll Film ▶ transparent	item no.		width/length		type	palett
	500.012		500 mm, 1700 meters		15 mic, transparent	30 rolls / palett
	500.017/1		500 mm, 1700 meters		20 mic, transparent	25 rolls / palett
	500.017/2		500 mm, 1700 meters		23 mic, transparent	25 rolls / palett

PRODUCT BENEFITS

- ▶ available in PP and PET
- ▶ variable lengths (on the roll)
- ▶ weldable
- ▶ high edge tear resistance
- ▶ best shock absorption
- ▶ universally applicable
- ▶ custom made (size, thickness, material, individual print) on demand

Strapping Bands

Thanks to their high tensile strength, plastic strapping bands are ideal for bundling and securing light and medium-weight goods. Suitable seals and sealing tools for our strapping are available on request.

- ▶ PET, PP
- ▶ weldable
- ▶ on the roll

item no.	size	thickness	material	colour	meter/rolls	per box
500.040	12,0	55 mic	PP	black	3.000 meters	2
500.041	15,5	70 mic	PET	green	1.750 meters	2

Edge protectors / Corrugated cardboard

Edge protectors made of solid cardboard in brown, perforated or unperforated and our corrugated cardboard blanks in brown for optimum protection of goods.

- ▶ corrugated cardboard
- ▶ brown
- ▶ solid board
- ▶ brown
- ▶ perforated/unperforated

item no.	size in mm	material	type	per box	palett
501.011	1.200 x 800	cor. cardboard	brown		550
501.110	120 x 50 x 50	solid board	brown	1.400	16.800
501.111	1.200 x 50 x 50 x 3	solid board	brown, perforated	25	3.400
501.113	1.400 x 35 x 35 x 2,5	solid board	brown	100	5.000
501.118	1.600 x 50 x 50 x 3	solid board	brown, perforated	25	3.000

Additional information

material science

PA: Polyamide

- ▶ high hardness and toughness
- ▶ good resistance to organic solvents
- ▶ susceptible to acids and oxidizing chemicals

PE-HD: high density polyethylene

- ▶ stronger and more resistant to chemicals than PE-LD
- ▶ usable up to approx. 100 °C

PE-LD: low density polyethylene

- ▶ extremely flexible
- ▶ good resistance to chemicals
- ▶ not very resistant to organic solvents
- ▶ usable up to approx. 80 °C

PP: Polypropylen

- ▶ vulnerable to strong oxidizing chemicals
- ▶ steam sterilisable at 120 °C

rPET: recycling polyethylene terephthalate

- ▶ high strength, crystal clear, dimensionally stable
- ▶ made of recycled material (PIR)
- ▶ good resistance to aqueous and acid solutions
- ▶ limited temperature resistance

rLDPE: recycling low density polyethylene

- ▶ made of recycled material (PIR)
- ▶ good resistance to chemicals
- ▶ extremely flexible
- ▶ not very resistant to organic solvents
- ▶ usable up to approx. 80 °C

Sterilisation resistance of our plastics (without guarantee)

	Steam sterilization 121 °C, te 20 min n DIN	°-Radiation 25 kGy	Gas (ethylene oxide)	chemical (Formalin, Ethanol)
PA	no	yes	yes	yes
PE-HD	no	yes	yes	yes
PE-LD	no	yes	yes	yes
PP	yes	no	yes	yes

Chemical resistance of our plastics to important groups of substances (without guarantee)

A = very good chemical resistance, no damage to the plastic within 30 days of constant exposure, plastic can also remain resistant for years.
B = good to conditional chemical resistance, minor damage within the period from 7th-30th day under constant influence
C = low chemical resistance, not suitable for continuous exposure to the medium, damage can occur immediately

Tensile strength scale

Technical customer information

Scale: The files are to be created to a scale of 1:1.

Colours: Images containing one or more spot colours should use the Pantone color system. The true color can also be found in the file. If the HKS system or others are used, will be adapt the colours approximately to Pantone. We cannot accept any liability for deviations that might result from this.

Files: Files should be open and editable. Please do not use closed EPS files. If possible, send us Mac files. Flat images (logos etc.) should be provided as vector graphics in a vector data program. Unfortunately, we cannot accept pixel graphics (scans) since they leave logos with unsharp edges.

Fonts: The fonts provided with files should be original (character set and postscript character set). Smaller font sets (logos, company names) can be converted into paths or drawing paths. For files created on a Windows computer (PC), fonts need to be converted into paths or drawing paths.

Templates: Templates should be on a scale of 1:1. Originals (scan, film, plates, etc.) will need to be reworked. We can provide you with an estimate for this work. Please note: grid work must always be agreed with us.

Plates: We accept no liability for plates regarding distortion, screen, condition, etc. When sending plates, we also ask you to provide a colour proof and a finalised layout. If you sent data by email, printouts should be forwarded to us immediately by post.

Printing: The client is responsible for compliance with copyrights, patents and trademarks, etc. Squared prints (max. 24-26) can differ from the proof/PDF since they cannot be displayed 1:1 on the proof. Prints have an unprintable edge of approx. 5 mm. Pressure displacement or register inaccuracy in millimetres do not constitute grounds for complaint!
